

Product Description

E-MetroTel UC^X for Meridian 1 & CS1000 Customers

Your voice, video, messaging and call center applications can now converge on a **single flexible server platform** that intelligently distributes communications across your organization. Everyone, whether they are at a main office, a branch office, or on the road will have the same enhanced communication capabilities - so they can easily and quickly take care of business.

A **single user license** per extension provides you an all-in bundle of UC applications that includes Find-Me / Follow-Me Mobility, Conferencing, IVR, Call Recording, Call Detail Reporting, Call Accounting, Unified Messaging, Call Center, in addition to a full suite of business communication features.

UC^X includes unlimited SIP trunks, helping to further **lower your communication costs**.

Today, more than ever, Enterprises are looking for business communications solutions that are tailored to meet their specific needs while offering an evolutionary Evergreen migration path to next generation SIP-based communication technology.

The E-MetroTel Evergreen approach supporting IP/SIP and traditional digital and analog phones simultaneously with a built-in suite of UC applications right out of the box, makes the UC^X the perfect choice.

Your Meridian 1 and CS1000 Migration to Unified Communications Starts Here.

The E-MetroTel UC^X IP PBX communication system is the ideal UC hub for **bridging existing phones with next-generation UC applications**. The UC^X solution helps Enterprise customers leverage their existing investments in legacy voice systems while seamlessly evolving to new SIP-based UC technology at their own pace.

Designed specifically for large organizations, the E-MetroTel UC^X1000 business communication system is an excellent **scalable platform for businesses that have between 100 and 5000 users**.

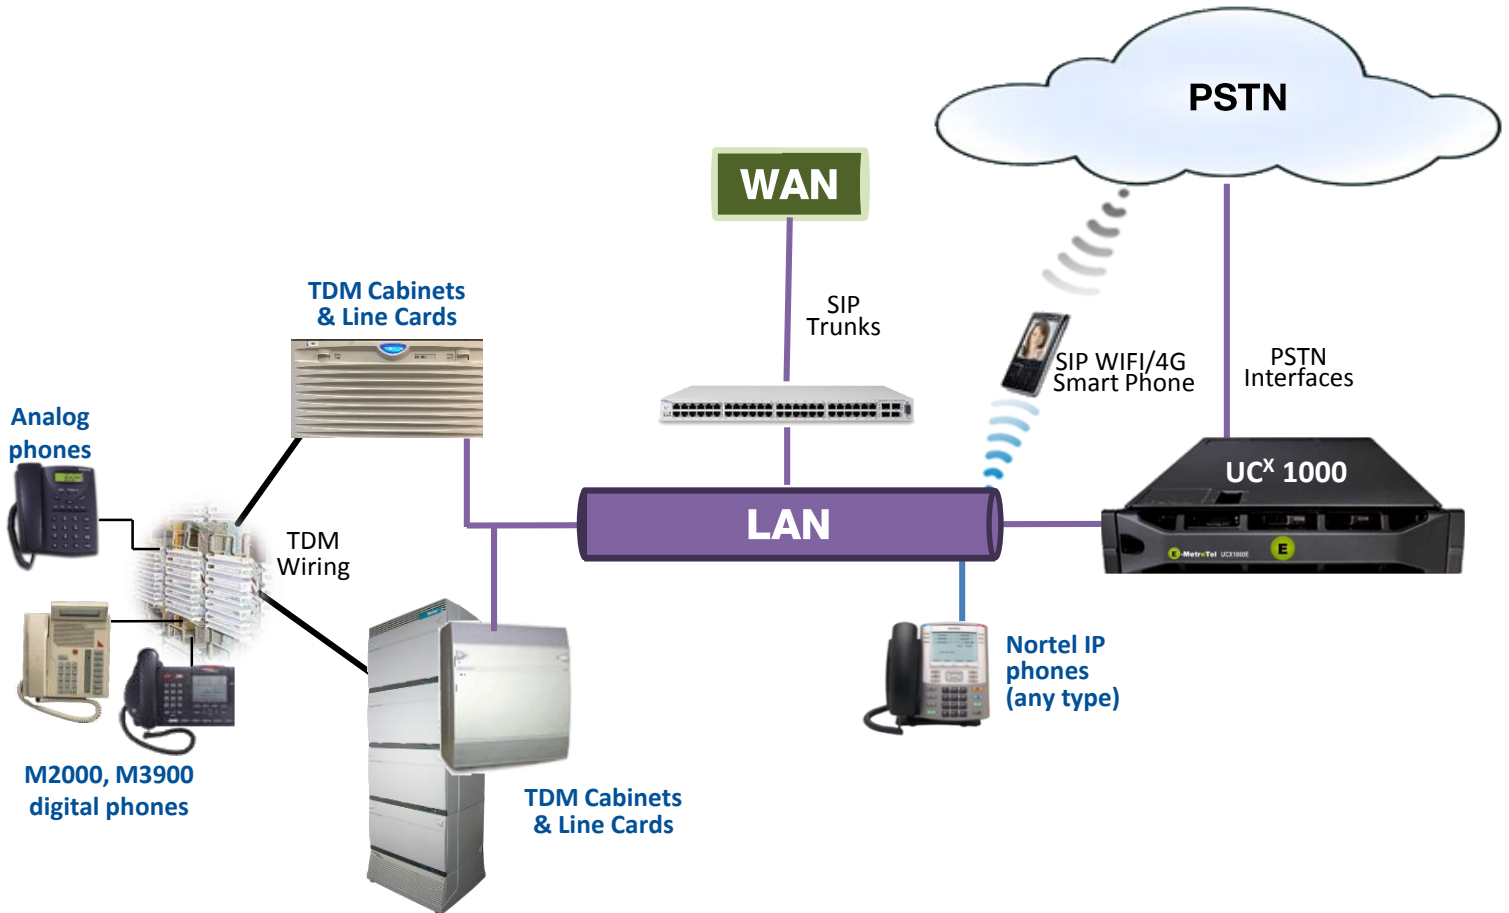

Ideal for Nortel customers, the UC^X1000 is a **cost-effective next-generation Meridian 1 and CS1000 PBX replacement** solution, supporting both IP and traditional digital technologies simultaneously, making your migration to VoIP deployment that much easier.

Re-use Meridian 1 and CS1000 phones, line cards and cabinets with similar telephone user interfaces, enabling you to immediately start benefiting from the latest in SIP-based technologies while leveraging your existing Nortel PBX investments.

E-MetroTel where Evergreen is alive and well.
