## UCx – Configuring Blacklist from an Extension

The Blacklist feature provides screening of calls from incoming routes. Any blacklisted number will be applied to all active inbound routes. If a 10 digit number is in the Blacklist, then the next time that Caller ID is presented to the phone system the caller will hear **“The number you have dialed is not in service. Please check the number and dial again.”**

From a user’s extension, perform the following steps:

### To Blacklist a number (Feature Code \*30#)

1. From any office extension, dial \*30#
2. From the system prompt, enter the number to be added to the blacklist, press 1 to confirm.

### To Remove a number from the Blacklist (Feature Code \*31#)

1. From any office extension, dial \*31#
2. From the system prompt, enter the number to be removed from the blacklist, press 1 to confirm.

### To Blacklist the last caller (Feature Code \*32#)

1. Receive a call on one’s extension
2. From your extension, dial \*32# to add the last caller’s number to the blacklist, press 1 to confirm.
